Dear Sir

I have to offer you my best thanks for a very excellent set of North American Views which reached me a short time since — I forwarded the packets for Dr Booth & Sir W. Hooker immediately you were so kind as to say that if there were any South American Views that I wished for you would endeavour to procure them for me

I am therefore induced to intrude again on your kindness if they should ever fall in your way. for specimens of the following

Aspidium fragrans, &c.
Woodsia hyperborea. Wr.
—— glabella Wr.

These I am aware are plants belonging to a high north latitude but it is very possible you may have them, Have you neither Hymenophyllum or Trichomanes in the United States?

Apologizing for thus taking advantage of your kindness

Believe me yours truly

W. Gerard

P.S. I have not despaired of any more sets of Tendlay plants yet - I shall be most happy to offer any duplicate that I possess if they would be interesting to you
